

DEUGRO PAPUA NEW GUINEA

A GLOBAL NETWORK OF LOCAL EXPERTS

“There may be more than one way to move it, but only one way to move it right.”

deugro Projects Australia is part of the deugro group which was established almost 90 years ago in 1924 in Frankfurt, Germany.

Today, we operate an extensive network of over 70 company-owned

offices, covering all continents, strategically located at gateways around the globe.

deugro has assembled a team of the best minds in the transport and logistics business, which means we can focus on logistics excellence and service leadership.

INDUSTRIAL PROJECTS

Your local deugro team will use the central control tower approach, where one office acts as the central expediting and shipment control center to coordinate and monitor global activities and events.

Your deugro central control tower is backed by

the deugro supply chain event management (SCEM) system, which clients can access 24/7 via Internet or EDI.

We operate in accordance with the highest industry compliance practices (FCPA, TSA, QA/QC, HSSE etc.).

Re-supply and MRO Supply Chain Solutions

Timely delivery of resupply items and maintenance, repair and operations (MRO) equipment is critically important to upstream oil and gas operations. Finding the right balance between required stock items and lean inventory management can be a challenge, so an efficient

and effective supply chain solution is crucial.

deugro teams excel in designing cost-effective transport and logistics models and support our customers in calculating reliable freight budgets.

Our end-to-end supply chain event management solutions are tailor-made for:

- Oil and gas projects and exploration companies
- Mining projects
- Power generation projects
- Services and equipment supply industry

Our capabilities include:

- Purchase order and vendor management
- Supplier and cargo expediting solutions
- Cargo track and trace on line item/article level
- Regular cargo consolidations
- Transport by air, ocean and overland
- Hand carriage / on-board courier
- Customs clearance and document control
- Tax/duty exemption processing
- Compliance practices

PROJECT LOGISTICS

deugro provides turnkey logistics solution for industrial projects with an office in Port Moresby and Lae. At Port Moresby, we can offer up to 20,000 m² of storage space.

With dedicated teams specializing in vessel and aircraft chartering, on-board courier services and operation of marshalling yards, we expedite and mobilize equipment of any weight and size, on time to any site.

- Project planning and scheduling, inspection of larger components at supplier fabrication yards, monitoring manufacturer's production line schedules, document expediting and cargo readiness.
- Track and trace / constant up-date of order status on line item level via Internet or EDI.
- Item consolidation solutions and transport cost reductions.
- Document control for temporary importation and re-exportation after equipment installation.
- Delivery to construction sites, dry dock or offshore supply bases by air, ocean, overland, multimodal, part or full vessel / aircraft charter or hand-carry solutions.
- Lower tier contractor performance review and KPI reporting.

Shutdown, Turnaround and Outages

Your local deugro team specializes in proactive order management solutions for shutdowns, turnarounds and outages.

Factory Expediting

We offer expediting and inspection of critical items at supplier fabrication yards, monitoring of manufacturer's production line schedules, document expediting and cargo readiness on a weekly or daily basis.

Repair & Return

We help with planning and scheduling for items exported and reimported after repair or maintenance, document control and daily expediting, as well as monitoring and progress reporting for timely reinstallation of items.

Project Management

Analyzing the costs of projects during a plant shutdown phase and the impact on start-up timing schedules, deugro designs customized shipping contingency plans, taking into account total costs of ownership to prevent rescheduling work projects and safeguard against production losses.

„Can-Do“ Attitude

We frequently develop project event process charts alongside our customers, including risk matrices, the deugro Group’s QHSES and compliance systems and time versus cost impact.

These charts not only display the entire transport and logistics chain, but can also simulate possible scenarios in case of unexpected changes in scheduling or events.

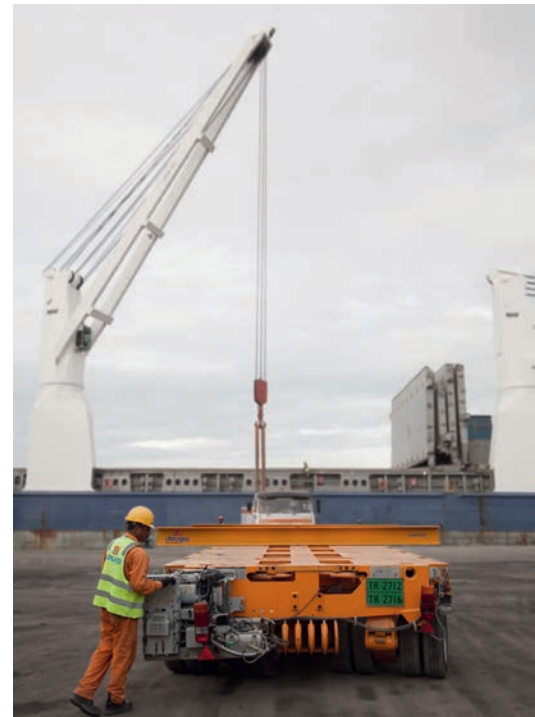

Track and Trace

deugro facilitates access to our interactive and web-based Supply Chain Event Management (SCEM) system, which gives you real-time, 24/7 visibility and traceability of order status on the line item level.

Our SCEM can interface with our customers’ Warehouse and Order Management Systems (WMS/OMS) and the most common Enterprise Resource Planning (ERP) applications.

The SCEM saves on costs and man-hours for our clients’ shipping, expediting and procurement departments by mitigating the risk of stock-outs, reducing the need to communicate with vendors and implementing item consolidation planning.

You have the choice to work with either only your system, through an interface with our SCEM, or to use the SCEM web application for a user-friendly quick view of your order status on the shipment, order, item or article level.

Besides simply tracing your items, SCEM users can generate tailored dynamic statistics and KPI reports, or populate any of our template reports with just a few mouse clicks.

Material Status Reports

- Track and Trace on line item / article level
- “Orders ready but not received”
- “Orders received but not shipped”
- “Orders in transit”
- “Orders arrived but not delivered”
- “Orders under import clearance”

Volume Statistics by Origin and Mode of Transport

Key Performance Indicator (KPI) reports:

- “Cargo readiness delayed”
- “Delays re. provision of supplier details”
- “Reminder sent re. cargo readiness”
- “Documents received with discrepancy”
- “Cargo delivery delayed”

Safety, It's our Priority

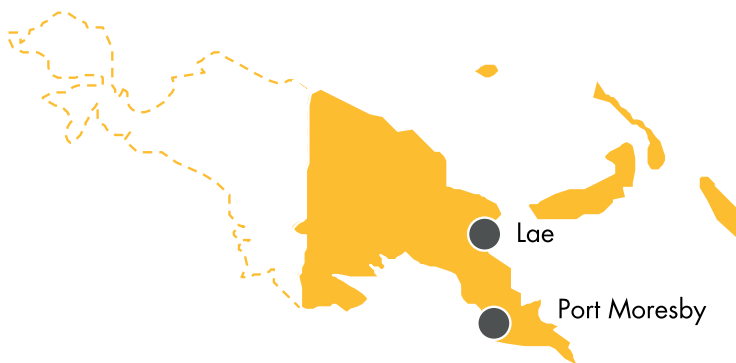

QHSES

At deugro, we firmly believe that our global objectives should be in harmony with a healthy and safe workplace, environmental protection and achieving fair returns that reward our efforts and service.

We are also committed to caring for and protecting the environment and respecting the communities in which we work. Our vision is to set the standard for QHSES within our industry.

YOUR PARTNER FOR INDUSTRIAL PROJECTS IN PNG

deugro (PNG) Ltd is a key provider for:

- Pre-feasibility studies and feed, project logistics, re-supply, supply chain solutions
- Our own heavy haul handling equipment including operators
- Our own storage locations and ground handling including in-house customs clearance
- Shipping agency services and husbandry
